Getting Started

Ladino is very similar to Spanish in the 16th century. That was when Spain's many ancestral Jewish and Muslim

peoples were expelled from the Iberian Peninsula, or were forced into conversion and hiding. Some phonetic sounds in Ladino haven't existed in Spanish for a very long time, like the hard 'j', and 'x' as a 'sh' sound. Sometimes Ladino is completely intelligible to Spanish speakers, and sometimes it is not.

Read aloud

Here are some phrases you can try:

Ke Haber? - What's New?

Guay de mi! - Oh my! (Oy!)

Keridos - Beloveds

Echar Lashon - Making chit chat (to throw tongue)

Kaminando kon buenos -Walking with good

Una grande bamya - It's a big okra.. (Oh no!)

Nochada buena - Good Evening

of the Spanish (Sephardic) Jews many with no knowledge of their ancestry.

For some, this may be a tool to find your way home.

Endangered languages are declining around the world. There are a number of efforts underway to preserve and promote the language, including language classes, cultural events, and online resources.w

The goal of Kitchen Lingua is to bring the Ladino language back to the United States, where it always has had a home.

Is Ladino Spanish?

Imagine a very old Jewish language developing from medieval Spanish, in many parts of the world, after the Sephardic Diaspora. The only place in the world Ladino survived and was well-documented was in the Balkans. Today Ladino is spoken by 100-200,000 people, primarily in countries like Turkey, Greece, and Israel.

Ladino shares most words with Spanish, while having a number of words from Hebrew, as well as other major languages where Jewish people settled. Ladino lacks a single grammar structure due to influences from the languages spoken in other countries where it spread. For many it can be an easier entry to learning Spanish. It used to be written with a Hebrew Alphabet, but is written like Spanish with a Latin script today.
